

IQ[®] Alpha Hedge Strategy Fund

IQHIX
IQHOX

Fact Sheet 12/31/2011

Fund Description

The IQ Alpha Hedge Strategy Fund seeks to track, before fees and expenses, the performance of the IQ Alpha Hedge Strategy Index. The Fund does not invest in hedge funds and the Index does not include hedge funds as components. The Fund is not suitable for all investors.

Index Description

The objective of the IQ Alpha Hedge Index is to provide superior returns and lower volatility relative to the S&P 500[®] Index. The Index also seeks to provide correlation that is similar to the correlation between hedge funds generally and the S&P 500[®] Index.

Features and Benefits

- Seeks hedge fund-like performance
- Seeks low correlation to equity markets
- Low fees [±]
- Daily liquidity
- Portfolio transparency – holdings available monthly
- No hedge fund manager-specific risk – Fund tracks rules-based index¹

Risk Considerations

- Investment in underlying ETFs
 - Tracking error to the Index
 - Use of derivatives
 - Use of leverage
 - Use of short selling
- See risk discussion on reverse side.

† annualized

The performance data quoted above represents past performance. Past performance is not a guarantee of future results. Investment return and value of the Fund shares will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than performance data quoted. Fund performance current to the most recent month-end is available by calling 1-888-934-0777 or by visiting www.indexiq.com. The Fund has a 2% redemption fee on shares held less than 7 days. Fund returns reflect dividends and capital gains distributions. Index performance is for illustrative purposes only and does not represent actual Fund performance. One cannot invest directly in an index. Performance data for the Index is net of the management fees for the Index's components, as applicable, but it does not reflect management fees, transaction costs or other expenses that you would pay if you invested in the Fund directly. No representation is being made that any investment will achieve performance similar to that shown.

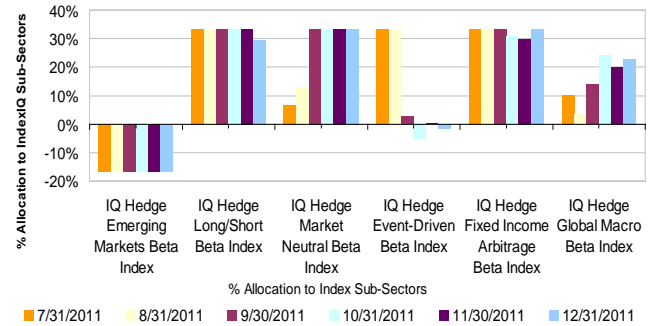

± Lower fees than typical hedge funds.

[†]The Fund's investment advisor has contractually agreed to waive fees and/or reimburse expenses through September 30, 2011, to ensure that the net annual Fund expenses (excluding certain fees such as 12(b)1 fees, taxes, and the fees and expenses of the underlying ETFs) will not exceed 1.65% for the Institutional Share Class and 1.90% (including 12b-1 fees) for the Investor Share Class, for the possible recoupment from the Fund in future years. Without these waivers, the Fund's total annual expense would be higher and performance would be lower.

Index Asset Allocation⁴ - 12/31/11

Monthly Strategy Allocation – 6 Month

Top 10 Index Holdings⁴ - 12/31/11

Ticker	Name	Weight
LQD	iShares iBoxx \$ InvesTop Investment Grade Bond Fund	37.37%

Maximum Drawdown Analysis Since Index Inception

	IQ Alpha Hedge Strategy Index	S&P 500® Index	HFRI FoF Composite Index
Maximum Drawdown	-18.01%	-50.95%	-22.20%
Drawdown Start	Oct-07	Oct-07	Oct-07
Drawdown End	Oct-08	Feb-09	Dec-08
Recovery Date	Sep-09	n/a	n/a

The maximum drawdown analysis measures the largest decline between any two points in the monthly return history of the respective indexes, and indicates the time period during which such drawdown occurred, as well as the date on which the index's returns had fully recovered (if applicable) all losses incurred during the drawdown period.

Consider the Fund's investment objectives, risks, charges and expenses carefully before investing. The prospectus and the statement of additional information include this and other relevant information about the Fund and are available by visiting www.indexiq.com or calling 1-888-934-0777. Read the prospectus carefully before investing.

Risk Discussion: Mutual fund investing involves risk, including loss of principal. There is no guarantee that the Fund will meet its objective. The Fund is not suitable for all investors due to its use of leverage, short selling, and derivatives, or for other reasons. Funds that use leverage to seek to increase return are subject to greater risk in adverse market conditions. There are particular risks associated with funds that employ short sales, such as the fact that the potential loss from a short position theoretically is unlimited. The Fund's use of derivatives, such as swap agreements, may expose the Fund to additional risks that it would not be subject to if it invested directly in the securities underlying those derivatives. The Fund's investment performance, because it is a fund of funds, depends on the investment performance of the underlying ETFs in which it invests. There is no guarantee that the Fund itself, or each of the ETFs in the Fund's portfolio, will perform exactly as its underlying index. An investor in the Fund will bear the operating expenses of the underlying ETFs in which the Fund invests. The Fund is non-diversified and may be susceptible to greater losses if a single portfolio investment declines than would a diversified mutual fund. The IQ Alpha Hedge Strategy Fund is not intended to provide a complete investment program and should be considered a speculative investment.

The objective of the IQ Alpha Hedge Strategy Index is to provide superior returns and lower volatility relative to the S&P 500 Index and correlation that is similar to the correlation between hedge funds generally and the S&P 500 Index. The S&P 500® Index is an unmanaged index considered representative of the U.S. stock market (performance data assumes reinvestment of dividends, but it does not reflect management fees, transaction costs or other expenses). HFRI Fund of Funds Composite Index ("HFRI FoF Composite Index") is an equally weighted hedge fund index including over 650 domestic and off-shore fund of funds. The index is rebalanced monthly with performance updates three times per month. Sources for IndexIQ and benchmark data: IndexIQ, FactSet, Bloomberg.

¹The Fund employs a "passive management" – or indexing – investment approach designed to track the performance of the Index. The Fund invests primarily in the Index components that make up the Index.

²Alpha is a measure of a portfolio's actual excess returns and expected performance, given its level of risk (as measured by Beta); Beta reflects the sensitivity of a portfolio's return to fluctuations in the market (in this case, as measured by the S&P 500® Index); Sharpe Ratio is a measure of a portfolio's risk-adjusted performance (return per unit of risk)

³For performance reporting purposes, the inception date for the Institutional and Investor Class shares is the first day the Fund commenced operations (June 30, 2008). Performance is annualized.

⁴Demonstrates the allocations of the Index to the various asset classes represented by the Index's underlying ETFs. Negative values, if any, refer to short positions. Weights for each Index component include application of 25% leverage. The asset allocation information and holdings are subject to change without notice.

The Fund is distributed by ALPS Distributors, Inc., which is not affiliated with IndexIQ or the Fund's investment advisor.

The IQ Alpha Hedge Strategy Index is the exclusive property of IndexIQ which has contracted with Standard & Poor's ("S&P") to maintain and calculate the Index. S&P shall have no liability for any errors or omissions in calculating the Index. S&P 500® is a registered trademark of the McGraw-Hill Companies.
